

Prestige 680S

Description

The yacht offers spacious accommodation for a total of 8 guests and 2 crew members. You have four luxuriously equipped double cabins including an impressively large master cabin with a walk-in closet. A separate cabin area is provided for the crew members (skipper and hostess).

With a length of 21.46 meters and a width of 5.33 meters, the yacht offers plenty of seating and lounging areas, so you have plenty of space with your family or friends to relax and soak up the sun on board.

Thanks to the two Volvo Penta IPS motors with joystick control and a total of 1,800 hp, speeds of up to 30 knots (approx. 55 km / h) are possible and also allow larger distances to be covered in just a short time.

Another technical highlight is the built-in stabilizer from Seakeeper, which prevents the so-called rolling (rocking) of the yacht when anchored and thus guarantees a relaxed and restful stay on board even outside of a marina.

Air conditioning in all rooms and a water treatment system complement the high-quality technical equipment of our yachts for your comfort on board.

The yacht is technically state-of-the-art and ideally suited to explore areas far away from mass tourism regardless of external supply.
